

# UltraSonic<sup>®</sup> Acoustic Panels

Made from recycled textiles, UltraSonic eliminates unwanted ambient noise and excess echo within areas where clear, crisp sound quality is desired. Spaces containing hard surfaces often generate irritating acoustic conditions; UltraSonic lowers excessive noise levels and allows for excellent sound clarity, improving the quality of any environment that suffers from poor acoustics.

- Available in a Graphite color
- Each package contains six 1' x 1' squares
- 80% recycled content
- Absorbs 85% of sonic energy, improving sound quality and cancelling echo/reverberation throughout the space
- Easy installation and relocation with included Command strips. Will not damage the finish of the surface it is attached to.
- Non-flammable and will not support mold/mildew growth
- One or two packages should effectively treat a standard room
