

Natural Treated Cotton Fiber is safe to handle and does not contain formaldehyde or other harmful chemicals

UltraTouch™ Natural Treated Cotton Fiber

- No Itch or Skin Irritation
- Resists Microbial Growth
- No Formaldehyde
- No Harmful Irritants
- No Health Warnings
- No VOC Concerns
- Fire Retardant
- Multiple Uses

UltraTouch Natural Treated Cotton Fiber is made from post consumer or post industrial recycled denim that is baled.

Natural Treated Cotton Fiber contains no fiberglass and does not itch or cause skin irritation. The fibers are treated with a non-toxic solution that actively inhibits the growth of mold, mildew, bacteria and fungi. This same treatment also acts as an excellent fire retardant, giving UltraTouch Natural Treated Cotton Fiber a Class-A Fire Rating.

USES: Natural Treated Cotton Fiber is used primarily as an acoustical, thermal and/or fire retardant treatment for pad manufacturers making bedding, appliance, automotive or insulation batting.

physical properties:

CONTENT	
FIBER SOURCE	Post-industrial or Post-consumer
CHEMICAL TREATMENT	Borate / Sulfate Solution

	TARGET	RANGE
MOISTURE CONTENT	10%	5 – 12%
LIMITING OXYGEN INDEX	24	24 – 30
